Objective

Innovative and results-driven Computer Science graduate with a robust background in full-stack development. Adept at leveraging JavaScript, React.js, Node.js, and database management to build scalable and user-centric applications. Seeking to contribute to a forward-thinking team where I can apply my technical skills and drive impactful projects.

Education

Bachelor of Engineering in Computer Science

Acharya Institute of Technology, Visvesvaraya Technological University (VTU), 2021

Skills

- **Programming Languages:** Python, JavaScript (ES6+), HTML5, CSS3
- **Front-end Frameworks:** React.js, Bootstrap
- **Back-end Technologies:** Node.js, Express.js
- **Database Management:** MongoDB, PostgreSQL, SQL
- **Version Control:** Git, GitHub
- **Other Skills:** Agile methodologies, RESTful API development, Responsive design, Problem-solving, Team collaboration

Projects

E-commerce Website

- Developed a full-stack e-commerce web application using the MERN stack, with features like product browsing, cart management, and payment integration.
- Implemented user authentication and built a seller dashboard for managing products and inventory.
- Designed a responsive UI using Material-UI, while efficiently handling state management with Redux and ensuring seamless navigation with React Router.

Expense Tracker

- Created a comprehensive expense tracker application using the MERN stack to help users manage and monitor personal finances.
- Features include expense categorization and visual data representation.
- Utilized React for a responsive and interactive user interface, and Express.js with Node.js for robust server-side functionality.
- Implemented MongoDB for secure and scalable data storage, enabling efficient expense tracking.

Work Experience

Command Centre Executive

ACT Fibernet

December 2022 – July 2024

- Created and generated performance reports on network health, uptime, and incidents, enhancing network reliability.
- Maintained accurate documentation of network topologies, devices, incidents, and processes, ensuring seamless operations.
- Responded to network events, escalating issues to designated teams for efficient resolution, minimizing downtime.
- Ensured and maintained the TAT (Turnaround Time) for resolving network down issues by effectively monitoring the entire network system.

Certifications

- Complete Web Development Bootcamp 2024 [MERN Stack] – Udemy.
- Python Programming Course 2024 - Scaler
